

## Midas Components Launch New Range

Midas Components Ltd specialises in the franchised distribution of Audible, Display, LED, EMC / EMI, Ferrite, Ultrasonic Sensor and Wound Products, together with comprehensive importing and global sourcing expertise.

The company brings together a wealth of experience in these product fields, with a true recognition of the high service needs of our customers. We are able to provide full technical and commercial support from initial concept through design-in to full production.

### NEW I2C COG Range in Farnell

Midas Displays are now offering a range of COG I2C Character modules with viewing areas to match industry standard COB types.

Features include:

- 2x16, 2x20, 2x24, 4x40 character formats
- small and large character function
- 1 line or 3 lines of characters function
- 3V OR 5V built in driving voltage
- Wide temperature range, -20 to +70
- I2C interface

Currently, only, 2x16 types are available in Farnell. But other types, such as 2x20, 2x24, and 4x40 will be available in Farnell in the near future. Please click [here](#) for the range in Farnell.

The displays are available in yellow/green STN with yellow/green LED backlight AND negative blue STN with white LED backlight.

### Spectrum Control Power Entry Modules

are ideal for applications including digital equipment, personal computers and peripherals, measuring instruments, home appliances, monitor and display units.

Features include:

- Bolt-in Rear Terminals for general purpose and medical applications
- Bolt-in Right Angle Terminals for general purpose and high frequency attenuation applications
- Snap-in with wire leads
- Bolt-in with wire leads
- Snap-in mount with rear terminals
- Bolt-in fused
- Bolt-in PCB Mount
- Bolt-in and Snap-in switched and fused
- Switched and Dual Fuse for European applications

### 400PT16P

400PT16P features include:

- 0.7-15 meters measuring range
- Open type ultrasonic transceiver
- Black plastic housing
- 40KHz frequency
- 2400pF capacitance
- 30 degrees beam angle
- -30 to +80°C operating temperature
- **Available from stock**

Midas can offer a full range of ultrasonic sensors, including: open and enclosed types, transmitters, receivers, and transceivers, along with a range of accessories. Please click [here](#) for the full range.

**Midas Components is split into three divisions -**

**Midas EMC providing EMI filters, connectors, and wound products –**

### Commercial/Industrial Circular Connectors

are the subject of a new catalogue issued by Spectrum Control. The range is ideal for high reliability or demanding environmental applications such as commercial aviation and avionics, off highway and agricultural vehicles and hi-rel power supplies.

Features include:

- Standard catalogue parts are non-ITAR
- EMI filtered or unfiltered styles
- Intermateable with MIL-DTL-38999 series III compact shell connectors
- 9 different shell sizes
- 5 different contact/termination styles
- 18 insert configurations
- Wall mount, jam nut, straight plug shell options available
- For a copy of the catalogue click [here](#)
